RESTRICTION REQUIREMENT

1.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to clear propylene glycol free deodorant stick, classified in class 424, subclass 065+.
- II. Claims 12-18, drawn to a combinatory anti-microbial mixture, classified in class 424, subclass 404.
- III. Claim 19-23, drawn to a clear propylene glycol free deodorant stick and antimicrobial combination, classified in class 424, subclass 065+ and 404+.
- IV. Claims 24-31, drawn to clear deodorant composition, classified in class 424, subclass 065.

2.

The inventions are distinct, each from the other because:

Inventions I, II, III, and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions all of the above stated inventions are products that have different modes of operation as well as different effects. The four different products do not require the particulars of one another and are viewed as patentably distinct inventions.

3.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
